GRAY MATTER

2014

WAKE FOREST SCHOOL OF MEDICINE
WINSTON-SALEM, NC

In Dedication...

The School of Medicine Class of 2014 dedicates this edition of *Gray Matter* to Dr. James Peacock. Since joining the faculty at Wake Forest School of Medicine in 1982, Dr. Peacock has served as the model clinician, educator, patient advocate, and academic investigator. Often described as the humble genius, it is impossible to capture the magnitude of impact of Dr. Peacock's efforts on the education of each individual pictured in this volume but also the School of Medicine and Medical Center at large. He has been bestowed every possible teaching accolade and award this institution has to offer many times over. This is in addition to his national recognition as a Fellow of the American Academy of Physicians and robust presence in the Infectious Disease literature.

Dr. Peacock's influence begins during the basic science years where his lectures are perennially the most well-attended and serve as the benchmark for all others. From the opening quote by Dr. Osler to the final teaching point, each masterfully crafted hour forms the foundation of our knowledge of Infectious Disease. His poignant and accessible lectures during this time have

been awarded with numerous Basic Science Teaching Awards and often receive standing ovations at their conclusion. As students move on to the clinical years, Dr. Peacock's lectures during Internal Medicine are equally as riveting and he has received the Clinical Teaching, Friend of Students, and Faculty Teaching Awards as regularly as the institution allows.

In the hospital he is the consummate professional. It is not rare to spot this bird rounding on his patients in the early morning before the medical students arrive. His notes are truly masterpieces crafted succinctly and logically to summarize the patient's history and pertinent clinical data. Every patient is treated with the same high degree of dignity and care regardless of age, gender, race, socioeconomic background, or medical condition. No patient complaint or story is too trivial for his undivided attention and effort. He imparts the sense of physician responsibility to those in his BAP group but also all those fortunate enough to be on his clinical team. After an exhausting day as the attending on the General Medicine or Infectious Disease Services Dr. Peacock can be found volunteering as a physician preceptor at DEAC. One of the many reasons he is mentor of the Gold Humanism Honor Society. His tireless and humble dedication to education, academia, philanthropy, patient care, and the greater human good are what make him the prototypical physician for this or any yearbook dedication.

Thank you for your wisdom, tutelage, compassion, and efforts. We will always cherish your love for the field of medicine which we are now privileged to join.

This is my wish for you: comfort on difficult days, smiles when sadness intrudes, rainbows to follow the clouds, laughter to kiss your lips, sunsets to warm your heart, hugs when spirits sag, friendships to brighten your being, beauty for your eyes to see, faith so that you can believe, confidence for when you doubt, patience to accept the truth, courage to know yourself, love to complete your life."

Thank YOU to my friends and family for walking beside me these past four years. To my family, the fearless four, I love you, love you, love you. To "my people" who have laughed, cried, and experienced "life" with me, I will ALWAYS carry a piece of you with me. Class of 2014, we did it.

Years ago, early mornings
after waking to the screeching of a pager,
I would ride my bicycle to the hospital
in the pre-dawn birdsong,
and then sit, waiting, for hours,
in the soiled utility room,
for the placenta to be delivered,
patience a necessity.
Punch biopsies were hurriedly deposited
into the suitcase-sized liquid nitrogen dewar,
then the whole lot zipped up
and lugged down basement corridors
to the MRI machines,
questions waiting to be answered.
The lobby, bright and airy,
with white linoleum
reflecting the California sun,
was often filled with musings from a grand piano.

Now, on early morning rounds,
our small herd,
a crowd with worn leather shoes,
dressed in crisp green and white,
we look up, just for a moment,
to admire the colors of another Carolina sunrise,

as we pass bays of windows,
along rows of empty rocking chairs
set once again at perfect angles
by the third-shift custodians.
Pieces of the insides of trees
crafted to cradle the outsides of humans.
Places to mark time, to nurse sorrows,
places to serve as metronomes
creaking through the afternoons.
Hospital rhythms.
Interlocking arms and hands,
broad-spectrum lights, bent heads:
a delightful grace pulses beneath
the humming and ping-pong,
the tangled cables and tubing.

Fresh off the press,
I page through an anatomy text
sitting on display at the library.
Flipping to the end, to the index,
as I have a question to answer...
...L-M-N-O-P...Pituitary body...
...Piriformis muscle...Planes of abdomen...
Just as suspected: the placenta is still overlooked,
and there is plenty of work still ahead.
